

Thank you for downloading the Wattyl Colour range files for ArchiCAD.

These allow you to quickly and easily use Wattyl's vast colour range in your ArchiCAD projects. You can quickly test different colour schemes & provide your clients with more realistic visualisations.

These colour files require ArchiCAD 9 or higher and work on both Macs & PCs.

All of the colours have been made into ArchiCAD materials and have also been optimized for use with the Lightworks rendering engine.

Adding Wattyl colours to your project or template files is an easy process:

1. Opening the Attribute Manager within the your project and selected the materials tab.

2. Attribute Manager will appear and prompt you to load the Material files into the project.
